

RAJAT BISHT

SOFTWARE | DATA SCIENCE | CREATIVE TECHNOLOGY

+91-8126432393 · rajatbisht913@gmail.com · [linkedin.com/in/rajatbisht937](https://www.linkedin.com/in/rajatbisht937) · github.com/rb937 · rb937.github.io

EXPERIENCE

Data Science Intern · Celebal Technologies

June 2026 – Present

CSI 2026 Program · Remote

- Building end-to-end ML pipelines on real-world datasets, including regression modelling and ARIMA time-series forecasting on automotive pricing data.
- Submitting weekly Jupyter notebook deliverables covering data cleaning, feature engineering, model evaluation, and hyperparameter.

PROJECTS

AI-Driven Fraud Detection System github.com/rb937/fraud-detection-system

Nov 2025 – Jan 2026

Python · Scikit-Learn · Pandas · Streamlit

- Engineered a real-time fraud detection pipeline using Random Forest, achieving **92% Recall** on a heavily imbalanced dataset via SMOTE oversampling and cost-sensitive learning.
- Developed geospatial risk features using Haversine Distance to flag location anomalies (transactions >500 km from home) and deployed findings as an interactive Streamlit dashboard.

ChromaEngine - Image Processing Engine

Dec 2025 – Feb 2026

github.com/rb937/ChromaEngine

Java · JavaFX · OOP

- Built a non-destructive image processing engine using direct-memory bitwise operations on ARGB channels, eliminating BufferedImage overhead for real-time performance.
- Implemented custom 3×3 convolution matrices (sharpen, blur, edge detection) to automate day/night cycle and lighting variant generation for 2D pixel-art asset pipelines.

Terminal Snake Engine github.com/rb937/terminal-snake-C

Feb 2025

C · Windows API · Systems Programming

- Implemented flicker-free rendering using Windows Console API cursor repositioning, eliminating system("cls") and achieving smooth high-framerate terminal output.
- Engineered velocity normalisation to correct terminal font aspect-ratio distortion and a dynamic difficulty curve with a terminal-velocity floor to maintain playability at high scores.

Wireless ESP32 Smart Car

2023

Embedded C · ESP32 · IoT · Hardware

- **First Prize — Youthopia, DIT University (Laser Tag).** Engineered a wireless-controlled bot with superior navigation and motion stability, outperforming competing teams.
- Programmed ESP32 firmware in Embedded C to integrate motor drivers and GPIO controls for real-time responsiveness under competition conditions.

SKILLS

Languages	Python, Java, C, R, SQL
ML / Data	Scikit-Learn, Pandas, NumPy, Matplotlib, Seaborn
Tools	Streamlit, Git, MS Excel, Power BI
Creative	Adobe Photoshop, Premiere Pro, Blender 3D
Hardware	Arduino, ESP32
Game Engines	Unity, Godot

EDUCATION

B. Tech - Computer Science Engineering (Data Science)

2023 – 2027

DIT University, Dehradun · CGPA: 8.0 / 10

CERTIFICATIONS

Programming Fundamentals - Duke University

Database Management Essentials - University of Colorado

Data Fundamentals - IBM

EXTRACURRICULAR ACTIVITIES

- Produced marketing reels and event highlight videos for the IEEE club at DIT University as part of the core video editing team.
- Organised multiple technical and cultural events as an active IEEE club member.
